

## wantland stadium expansion

The goal for the expansion of the existing University of Central Oklahoma Wantland Stadium, included in the project was an additional 12,000 spectator seats, 800 premium club level seats and 160 enclosed and climate controlled VIP seats. In addition to the new seating, the project included new concession stands, restrooms, as well as areas for the coaches to office and work. The project also greatly enhanced the technology of the Stadium, including but not limited to a new state of the art press box for TV and radio broadcasting, complete with coaches' booths, a new public access system / scoreboard and controls, and a game film camera platform
